Superior safety, greater stability
Faster transfers, enduring reliability

SWINGLIFT®
QUAD HC4020 - I Beam chassis

30 TON PAYLOAD
ON ROAD

• “Leg-Over®” Stabilisers for ultimate safety and stability
• Versatility and flexibility for your business
• Fast and easy operation
• Lightest tare side loader available in New Zealand
The internationally available I-Beam chassis was introduced to the New Zealand market by Swinglift® to offer a lower cost design to complement its highly-regarded and widely used lattice chassis and providing customers with a benchmark when comparing a Swinglift® chassis with alternative brand names of competitors sideloaders.

KEY FEATURES of the SWINGLIFT® I Beam chassis:
- Flat slide wear pads
- Adjustable precision machined side guide blocks
- Smooth transition between 20 and 40 foot container positions
- All slide wear pads and guides can be replaced in situ
- Reduced down time and maintenance costs when compared to competitors I-Beam designs.

HC4020 - 35IC-4
The Quad I-Beam Swinglift offers additional advantages:
- Tare weights from as low as 9220 Kg
- 35 Ton lifting capacity
- Capable of legally carrying 30 Ton containers on road
- Wide range of customisable options are available
- Fastest sideloader container transfer available

LIGHTEST TARE SIDE LOADER AVAILABLE IN NEW ZEALAND
